Art Unit: 1772

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-9, 15-19, 20-22 and 27-30, drawn to a rubber mat with cleats, classified in class 428, subclass 156.

II. Claims 10-14 and 23-26, drawn to methods of making cleated mats using mold surfaces with recesses, classified in class 264, subclass 297.5.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group II, claims 10-14 and 23-26; and Group I, claims 1-9, 15-19, 20-22 and 27-30 are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed could be made by forming the cleats by mechanical removal of rubber with coating to produce a skin layer.

Art Unit: 1772

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and since the fields of search are not co-extensive, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William
